How to light pilot light on rinnai tankless water heater

What size gas line does a Rinnai Tankless Water Heater require? Rinnai Tankless Water Heaters are designed to provide maximum performance and efficiency using either a 3/4" or 1/2" gas line, as long as sufficient gas flow is available. An undersized gas line can stress a tankless system and possibly reduce its lifespan, all Rinnai tankless water heaters are equipped with technology that safely ceases operation if they detect an inadequate gas flow. This innovative feature safeguards the unit from compromising performance and efficiency. The tables below list the maximum length for both 1/2" and 3/4" gas lines when paired with Rinnai Tankless Water Heater models. Note: that Table 1 is intended for Natural Gas and Table 2 is intended for Low-Pressure Propane Gas supplies.
